INTISARI

Latar belakang : Penerapan Standar Operasional Prosedur (SOP) dalam suatu organisasi tentunya didasari untuk berbagai kepentingan baik dari sisi manajemen dan juga pelaksana manajemen pada organisasi. Perawat profesional yang bertugas dalam memberikan pelayanan kesehatan tidak terlepas dari kepatuhan perilaku perawat dalam setiap tindakan prosedural yang bersifat invasif seperti halnya perawatan infus. Perawatan infus dilakukan oleh setiap perawat. Semua perawat dituntut memiliki kemampuan dan keterampilan mengenai perawatan infus yang sesuai standar operasional prosedur

Tujuan : Mengetahui faktor-faktor apakah dan paling dominan mempengaruhi kepatuhan perawat dalam melaksanakan standar operasional prosedur perawatan infus di Ruang Paviliun RSUD Saras Husada Purworejo

Metode : Penelitian ini termasuk penelitian deskriptif analitik dengan pendekatan waktu cross sectional. Jumlah populasi 23 orang perawat di Ruang Paviliun RSUD Saras Husada Purworejo dan kesemuanya dijadikan sampel. Pengumpulan data menggunakan kuesioner. Analisis data menggunakan teknik *chi square* dan regresi logistic.

Hasil : Analisis data menunjukkan faktor pengetahuan, sikap dan motivasi memiliki pengaruh terhadap kepatuhan perawat dalam melaksanakan standar operasional prosedur perawatan. Faktor karakteristik organisasi, karakteristik kelompok, karakteristik pekerjaan dan karakteristik lingkungan tidak memiliki pengaruh terhadap kepatuhan perawat dalam melaksanakan standar operasional prosedur perawatan infus di Ruang Paviliun RSUD Saras Husada Purworejo.

Kesimpulan : Faktor pengetahuan, sikap dan motivasi memiliki pengaruh terhadap kepatuhan perawat dalam melaksanakan standar operasional prosedur perawatan infus di Ruang Paviliun RSUD Saras Husada Purworejo

Kata Kunci : Kepatuhan Perawat, SOP (Standar Operasional Prosedur), Perawatan Infus
